

Session 1

25th June 2026

Introduction to Company

Android App -> Park Smart -> 2013
Auribises Technologies -> Finlo

Objective: Upskill You All -> StartUp (idea -> potential)

Introduction

Name, Like in technology, coding (1-5), expectation

Python Fundamentals (Basic - Intermediate - Expert) 2 weeks

AI Agents 4 weeks (1 week project)

1 Project -> College

1 Project -> Yourself + idea build

Introduction to Python

Python is a programming Language

Application engineering

Meant to Solve Problems

Problems are always Mathematical ?

Building right equations to solve problems

Time -> Least

$O(1)$

Space -> Least

Orange Juice Analogy

Oranges -> Source

|
Juicer
|
Liquid Juice
|
Pack
|
Glass

C/C++

MyApp.cpp -> Source Code

|
Compiler
|
MyApp.obj
|
Pack
|
MyApp.exe
MyApp.dmg

Java

MyApp.java

Python

MyApp.py

MVC Architecture for Software Development

MODEL

- Data
 - source location
 - destination location
 - type of cab

Optimization: Data Structures (DS)

VIEW

- Interfaces/Screens/UI
- Visual Interface with edittexts buttons etc

Optimization: User Experience (UX)

CONTROLLER

- Logic
 - shortest path, nearest cab (acceptance), least traffic

Optimization: Algorithm
equations

Ride Booking App

Introduction to AI

AI

|

ML (Supervised/Unsupervised)

|

DL (CNNs/RNNs) -> LLMs

Session 2

26th June 2026

Python Installation

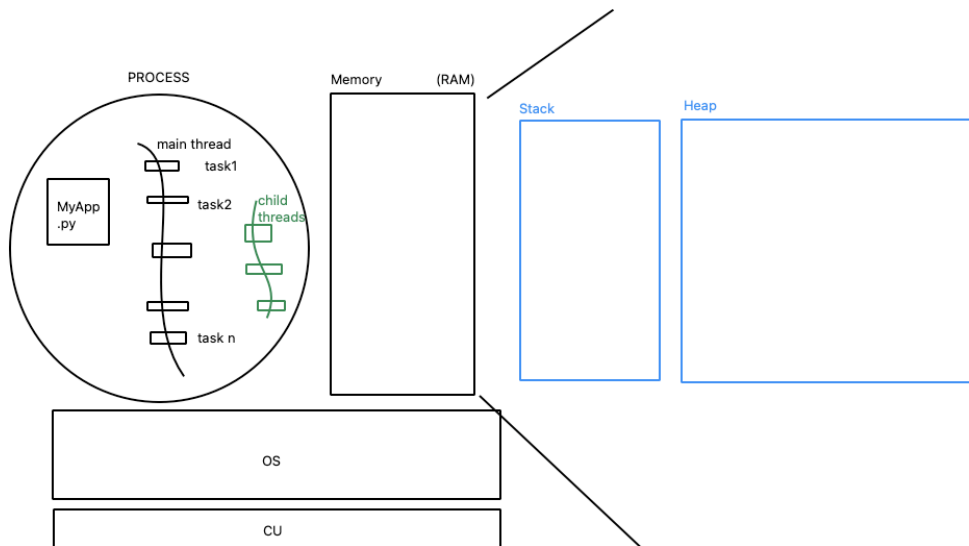

Python `__name__`

magic variables in python -> dunder -> `__name__`

For a program in python -> `__name__` -> `__main__`

Process

Memory

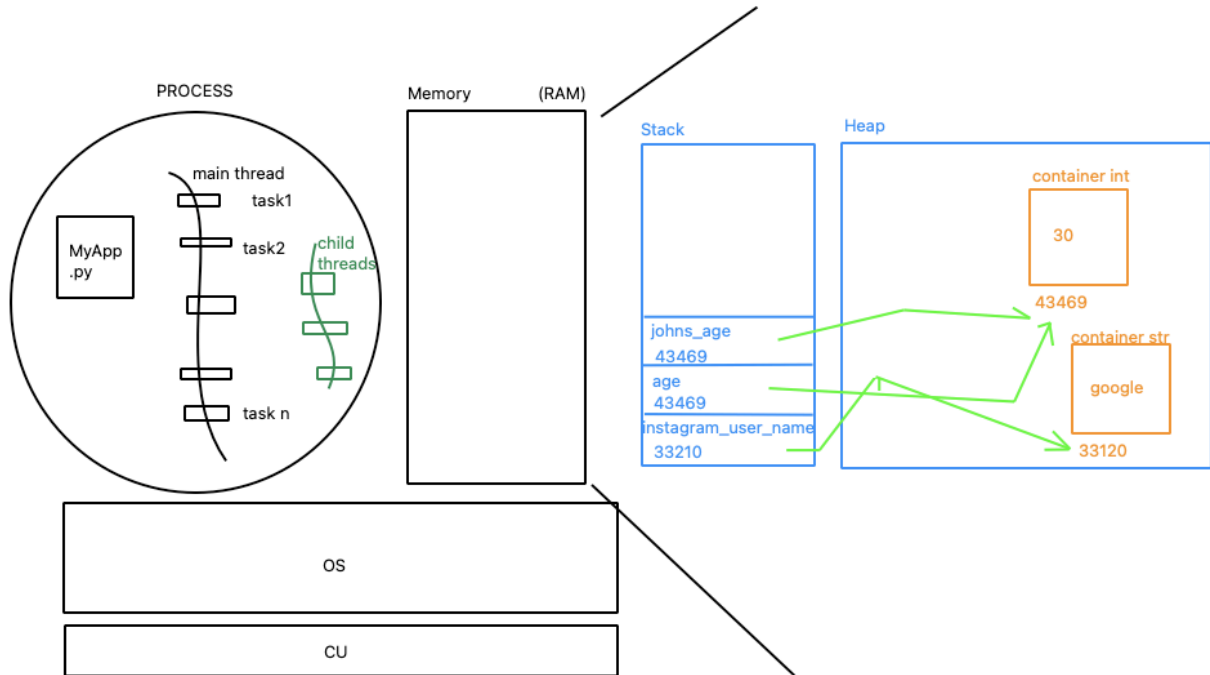

Model View Controller in Depth

Model -> Data

Single Value Container

instagram_user_name='auribises'
 email_id = 'info@auribises.com'
 age = 30

Multi Value Container -> DATA STRUCTURES

Homogeneous

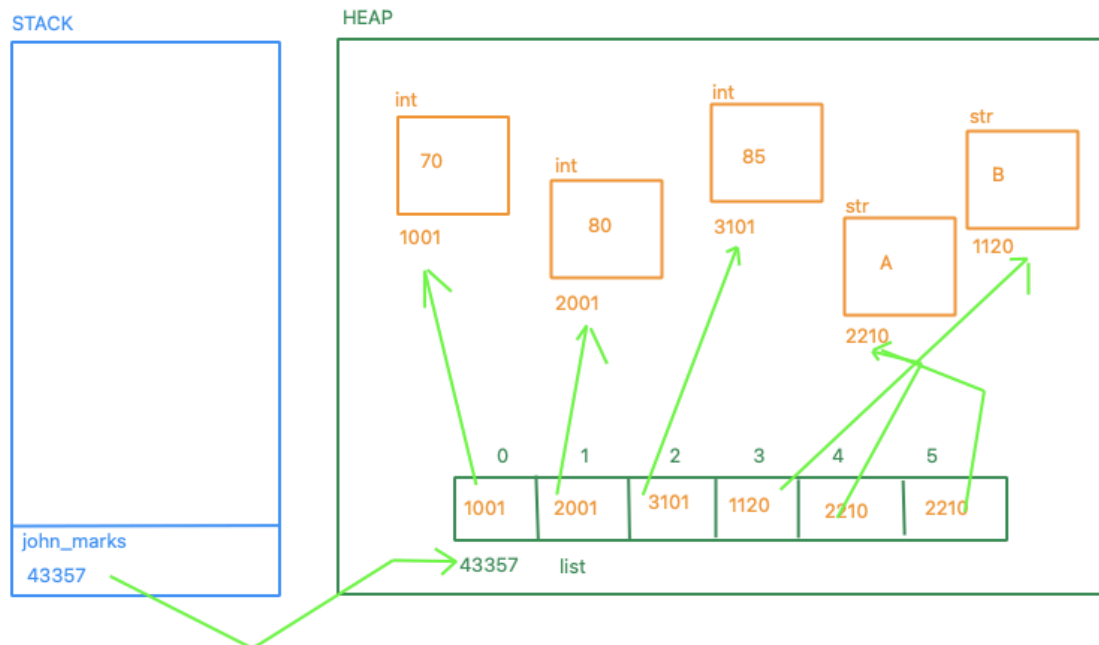

IG -> Album of Images

Amazon -> Products -> Shoes

Hetrogeneous

IG -> Album of Images + Videos

Amazon -> Shopping Cart -> Shoes + Shirts + Trousers + Soap

View -> Input Output

Controller -> Algorithm/Logic

Zomato Promo Code Use Case for MVC
